

Hopefully we'll work together

HOPE's only one child of a caring community
and so others become its kith and kin
therefore we'd never seek any immunity
from assisting, say one needing help to begin

Perhaps there's a grant that'll help you get through
but you need letters of support when you apply
we'd be only too pleased to provide this for you
if your chance of success is enhanced thereby!

So when the call comes, we certainly won't shirk
as there's a lot to be said about giving support
we also know that many hands make light work
and that collaboration works, we're pleased to report

If we are expert in some small way
we don't always need to work out a cost
we don't necessarily need to ask you to pay
as without such 'good will' we'd all be lost!

We can work together if our goals overlap
and so conserve resources that are often few
there are also others' skills we can tap
instead of always having to just make do!

You don't always have to 're-invent the wheel'
maybe you can use our experience for free
surely working together has some appeal?
so why not join us now in an MSP!
