

Boomerang Alliance

The Boomerang Alliance is a national peak not-for-profit group formed in 2003 with the aim of a zero-waste society.

- » We comprise **53 national, state, and local allies**.
- » Our **mission** is to be the peak NGO in Australia, driving the behavioural and systematic change required to deliver the social, economic and environmental benefits of a zero-waste society and to support waste reduction across the Asia Pacific region.
- » Our **core strategic objectives** are:
 - To transition to a zero-waste society by leveraging strategic opportunities to drive best practice resource efficiency and recovery.
 - To cut 70% of Australia's contribution to plastic pollution entering the oceans by 2020.

Some of our campaigns

Plastic Free Places

- » Our Plastic Free Places program works in communities to directly reduce single-use plastic packaging items and to empower communities to make lasting changes towards a circular economy.
- » Find out more and how you can help [here](#).

Balloon Release Ban Petition

- » What goes up must come down! Let's stop the release of helium balloons that are harming or killing marine animals and birds. While a few states are taking some steps to act - we need the Australian continent and oceans to be fully protected.
- » Find out more and how you can help [here](#).

Cash for Containers

- » Our aim is to make Australia be the first continent on the planet to adopt Cash for Containers – and we are almost there! The Container Deposit Scheme reduces the amount of beverage container litter and increase the amount of recycling by using a financial incentive (10c in Australia).
