

GM Free Australia Alliance (GMFAA)

The GM-Free Australia Alliance Inc is an independent not-for-profit alliance of organisations and individuals sharing a common concern and motivation to act on the threat of Genetic Manipulation (GM) in Australia.

- » Our **vision** is for GM-Free, diverse, sustainable farmer-managed agriculture, and a safe and affordable GM-Free food supply for all Australians – now and into the future.
- » Our **mission** is to facilitate cooperation between and coordinated action by the groups which make up the Alliance.
- » Our **purposes**: (1) Coordination - a national body to magnify the power of groups and people concerned about GM crops and foods; (2) Leadership - identify opportunities and challenges, organise effective actions and initiate change; and (3) Action - create events and activities to support GM-Free food and farms.

Our main campaign

GM Freeze

Protecting our farms, our food, and environment

We are calling for a freeze on all GM crops and food approvals in Australia. This means: no new GM crop approvals, no new GM foods and no new GM crop growing areas.

During the GM Freeze, the safety of GM foods for sale in Australia must be re-assessed and data on yield, pesticide use and effects on biodiversity of GM crops in Australia must be publicly investigated.

Read more about GM Freeze [here](#).
